 Tremolo

## PEDAL

16' Untersatz  
 8' Principal  
 8' Gedeckt  
 4' Octave  
 4' Rohrflöte

*Reuter Opus 1742 was built in 1970 for display and use at the Pacific Southwest Synod Convention in Los Angeles. Over the years, this electro-pneumatic instrument has served as a residence organ in three locations – California, Minneapolis and Texas. In 2006, it was returned to the Reuter facility for updating. Both reservoirs were completely releathered and the old blower, formerly housed in a remote location for sound insulation, was replaced with a new, quiet blower installed in the case. A new DC power supply and electric tremolo were added, as well as new wiring and cables. The zinc bass pipes were refinished and the entire organ was cleaned and given a fresh coat of lacquer. This organ has now been relocated to its fourth home at The Institute of St. Joseph in Chippewa Falls, Wisconsin.*
