

Miami, Florida
 Built in 1972 by Reuter
 Two manuals, 11 ranks

Price reduced to \$12,000.00
 or make an offer!

This electro-pneumatic instrument was designed with the Principal and Mixture ranks exposed. The rest of the pipework is in a chamber with two shutter fronts, one equipped with individual shade actions. Although it has not received a recent Reuter site evaluation, photos indicate two changes have been made over the years—a wooden Subbass has been added (exposed on the gallery wall) and the original trumpet stop has been replaced. Additional photos are available for viewing on page 2 of this listing. The organ is being offered on consignment. Please contact us for more information!
